

EnviroBest®

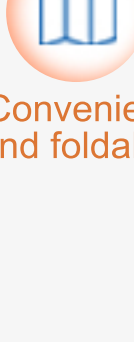

200W Portable Solar Folding Panel DS200

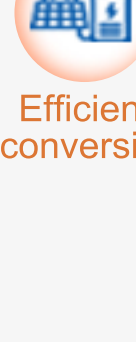

1-year product & power warranty

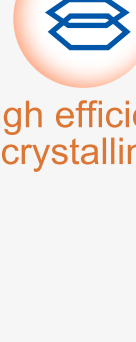

Overtemperature protection

Convenient and foldable

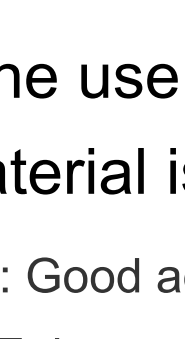

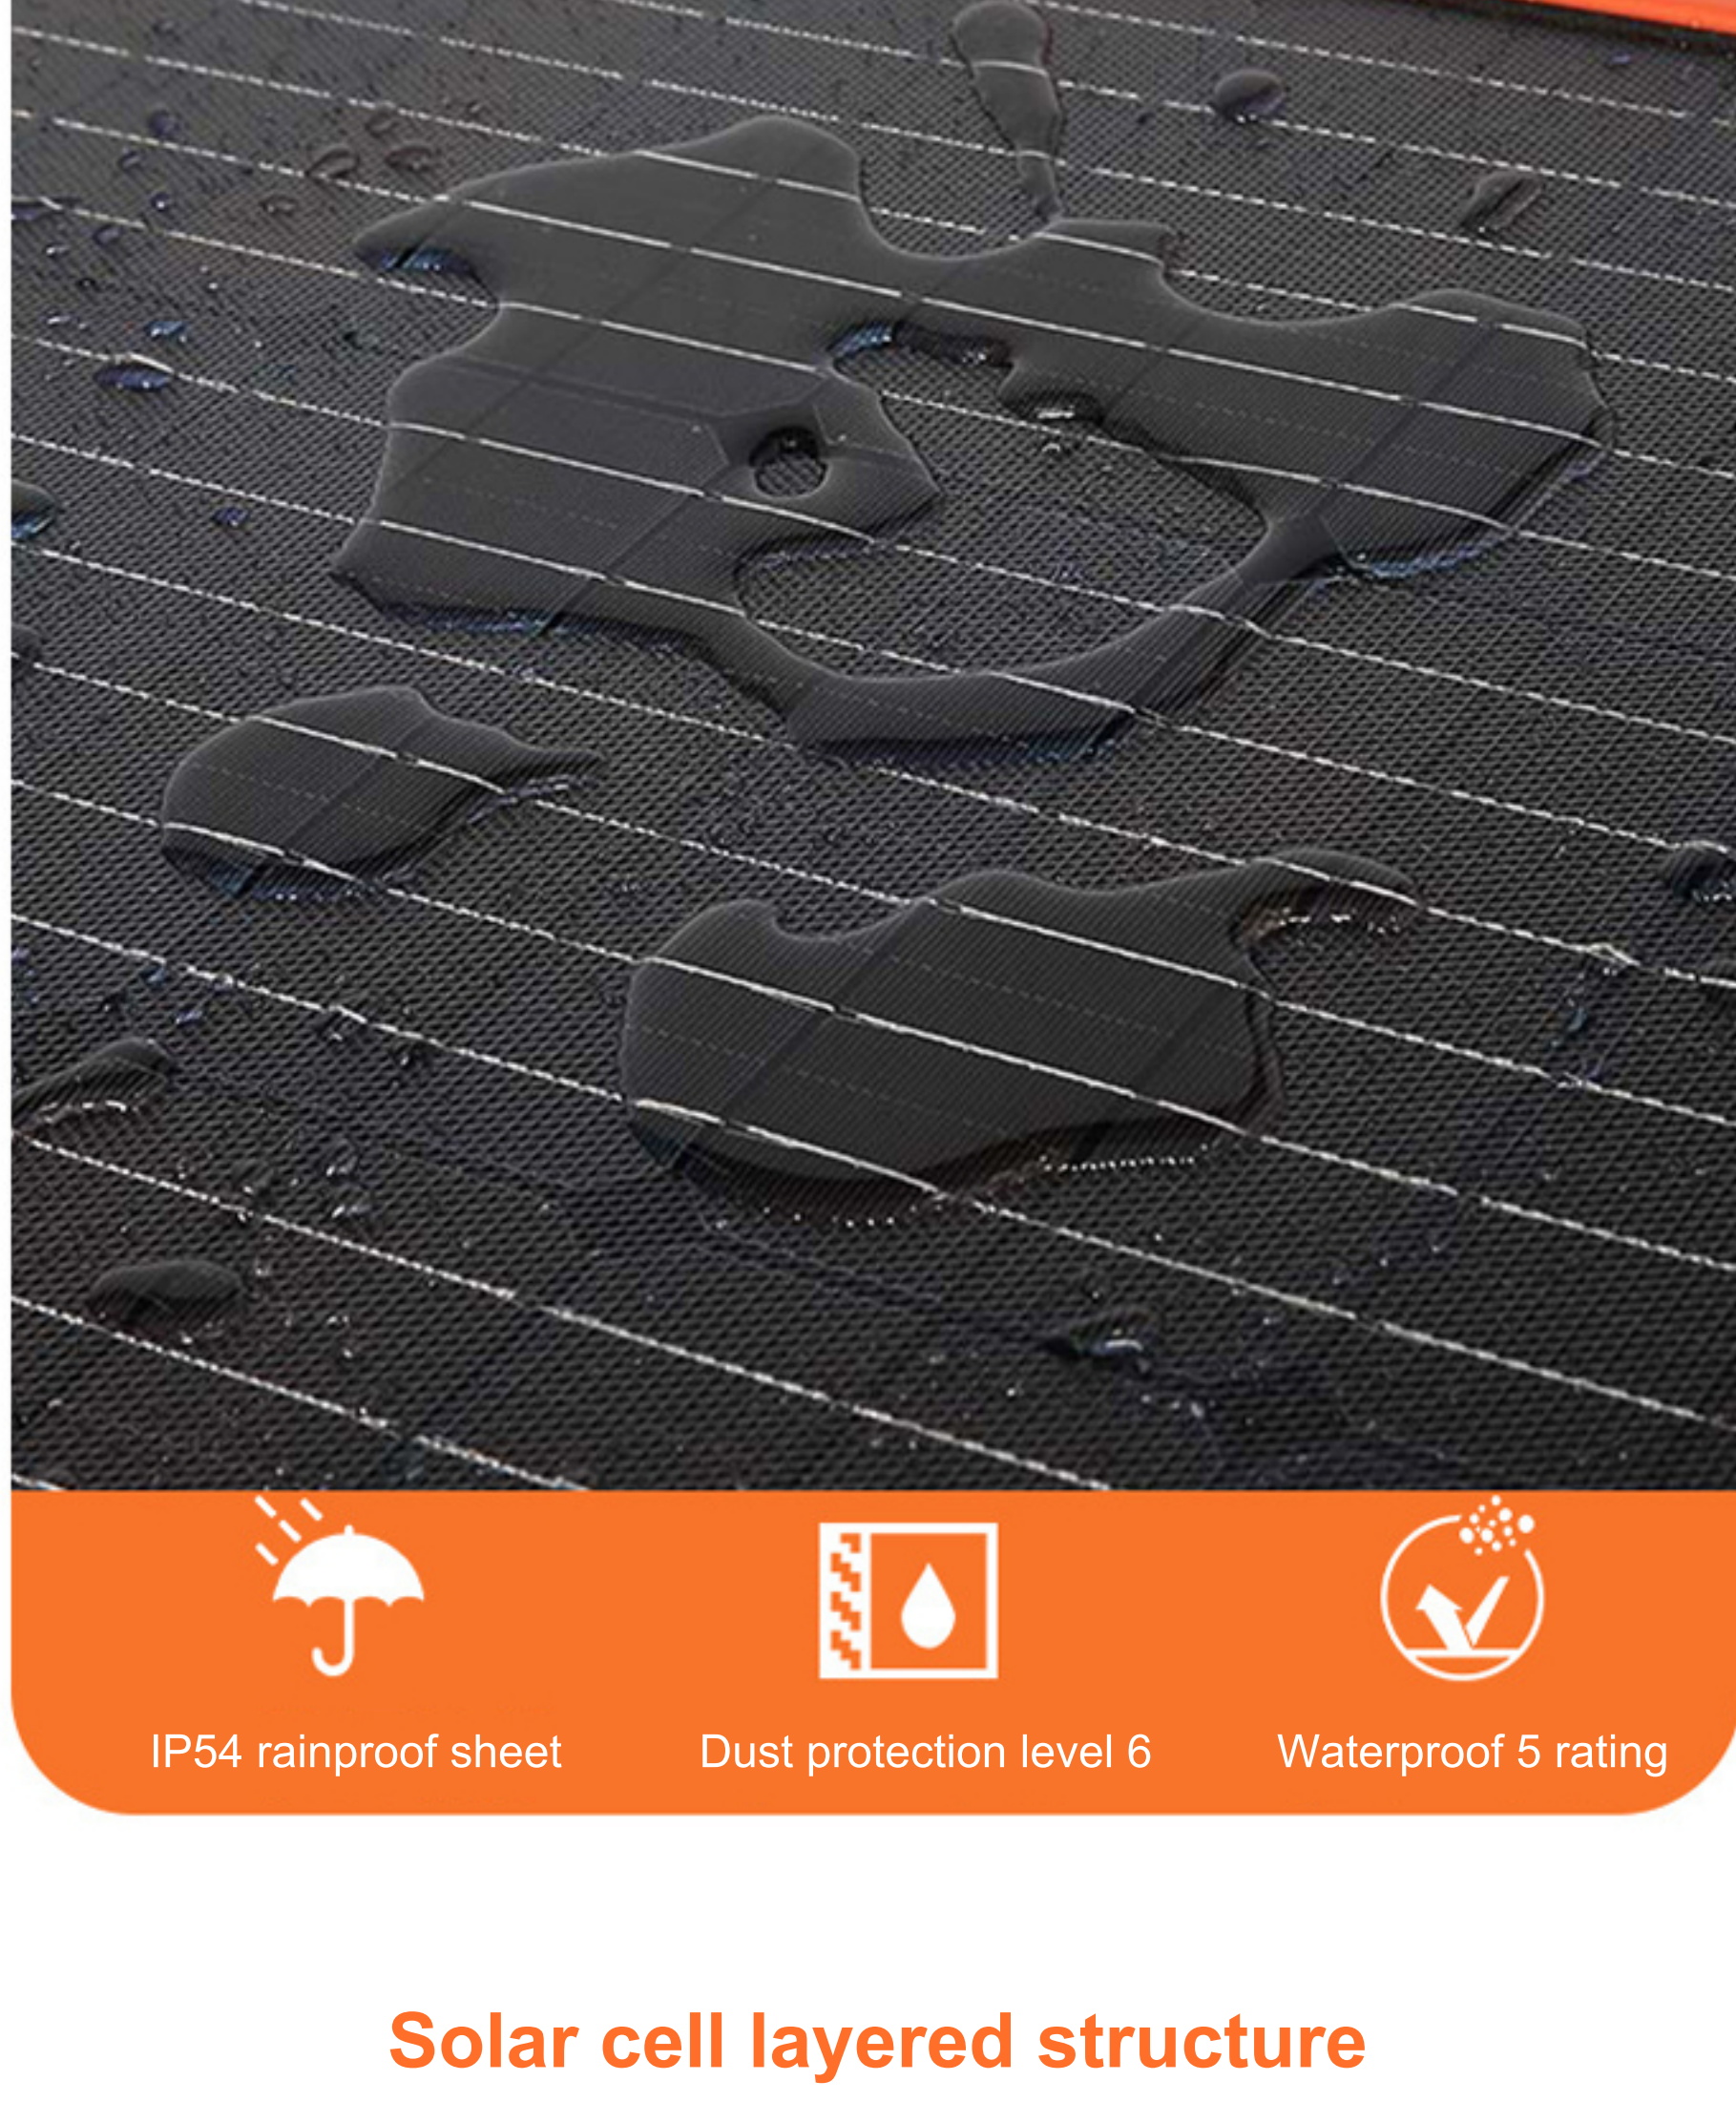

Efficient conversion

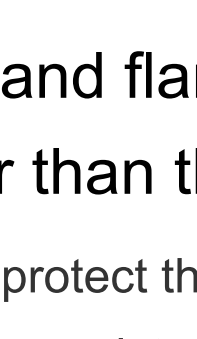

High efficiency monocrystalline silicon

Waterproof, dustproof and high temperature resistant

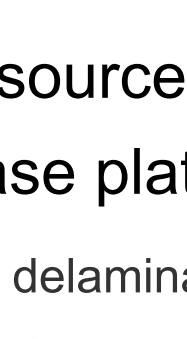

The use of ETFE transparent film has high light transmittance and is also waterproof, high heat resistance and hardness, corrosion-resistant solar panels are easy to clean, calmly cope with various harsh environments

IP54 rainproof sheet

Dust protection level 6

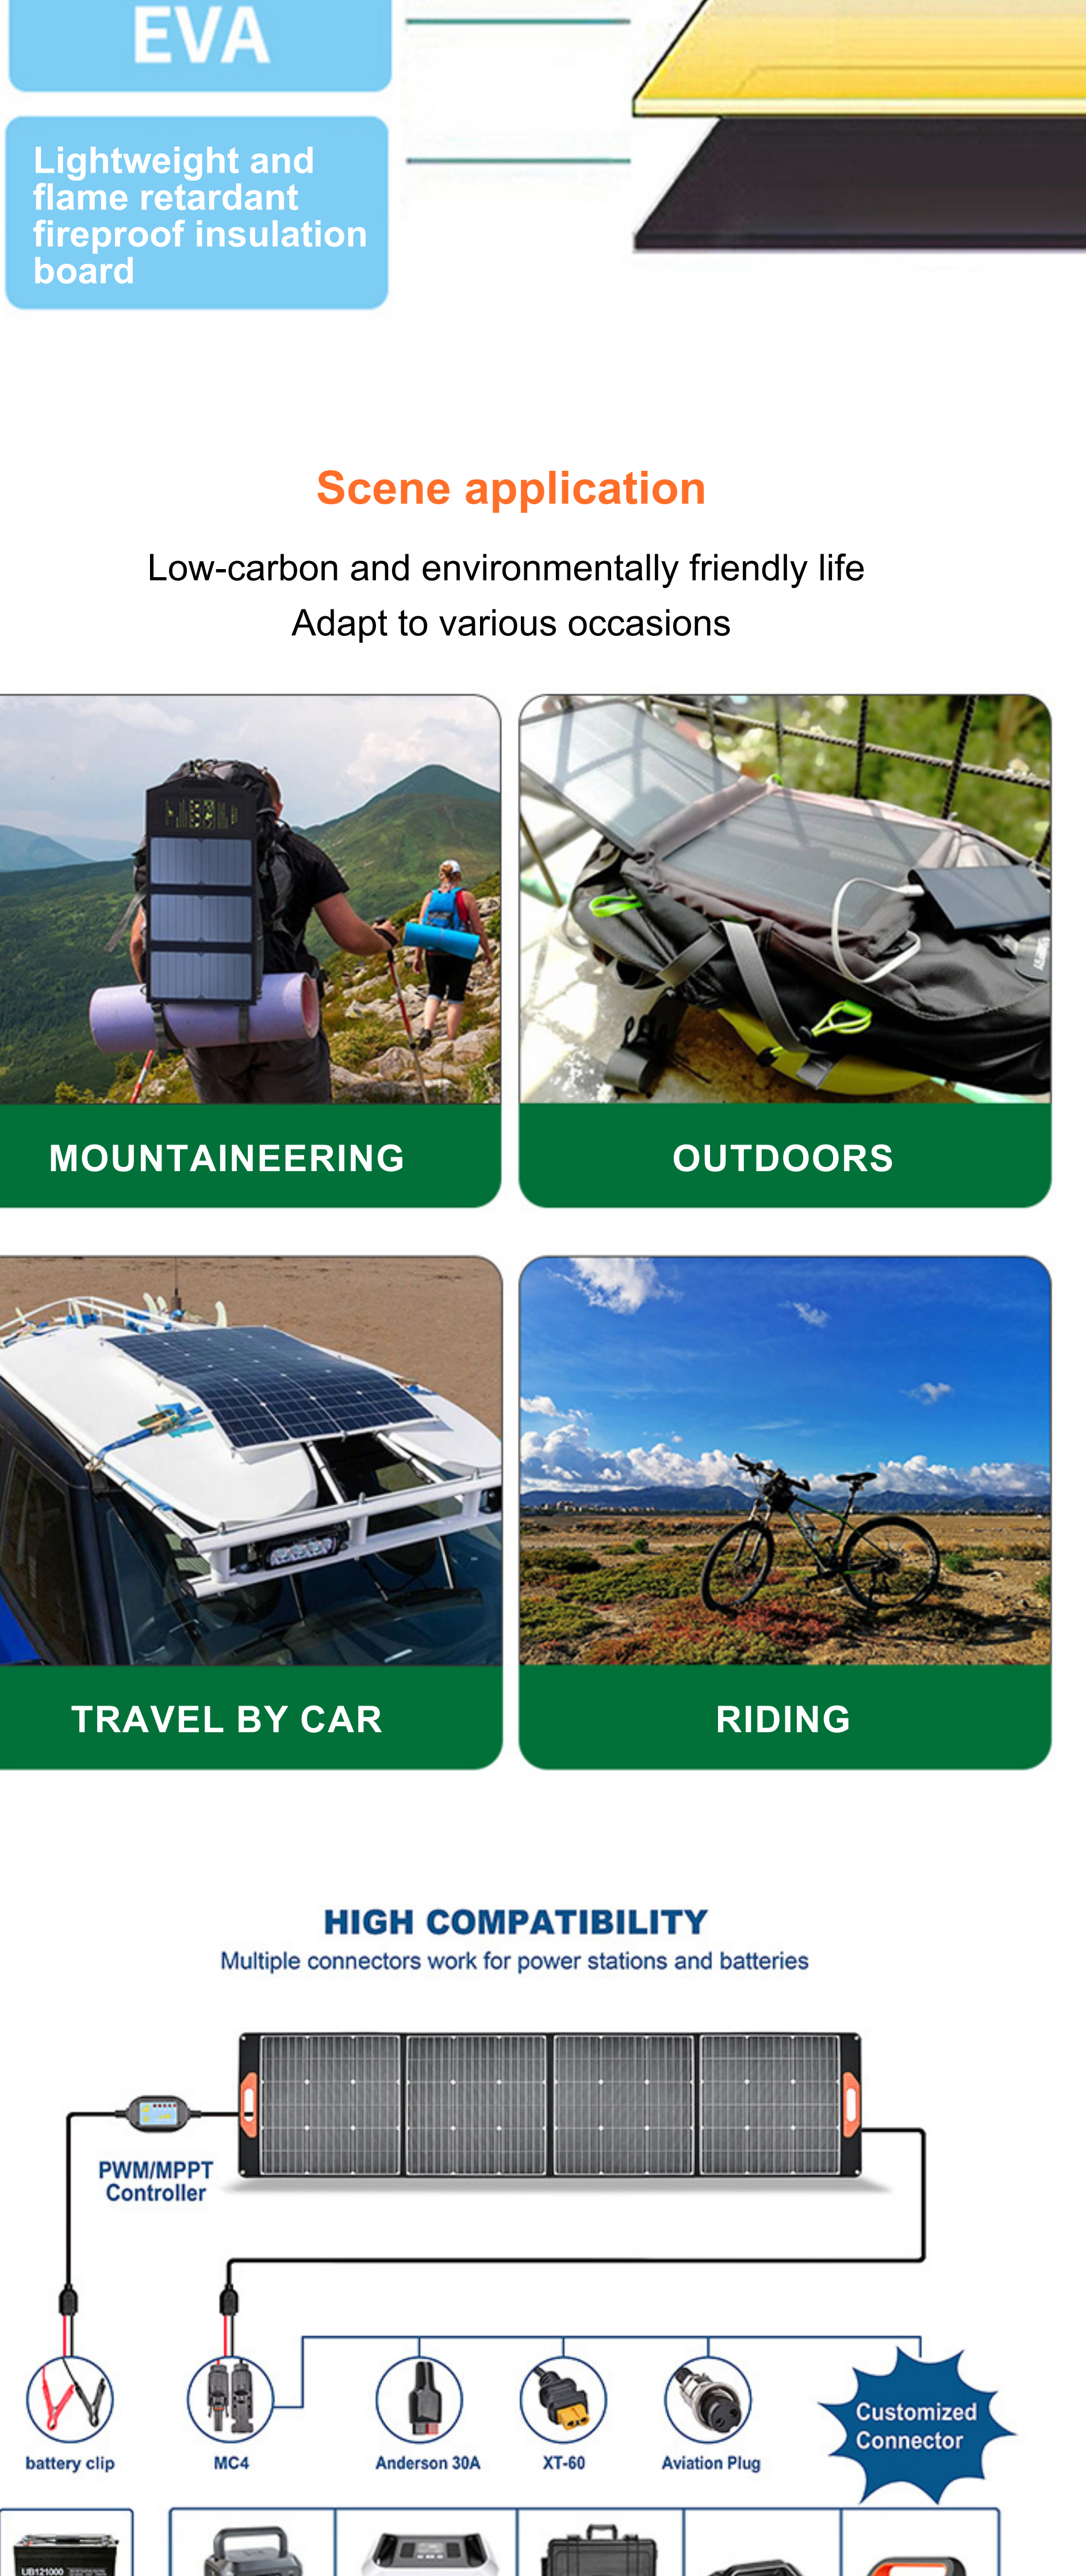

Waterproof 5 rating

Solar cell layered structure

The use of lightweight and flame-retardant source material is 0.5KG lighter than the Puneng base plate

EVA: Good adhesion properties protect the cell and prevent delamination

ETFE: has good high temperature resistance, corrosion resistance and weather resistance

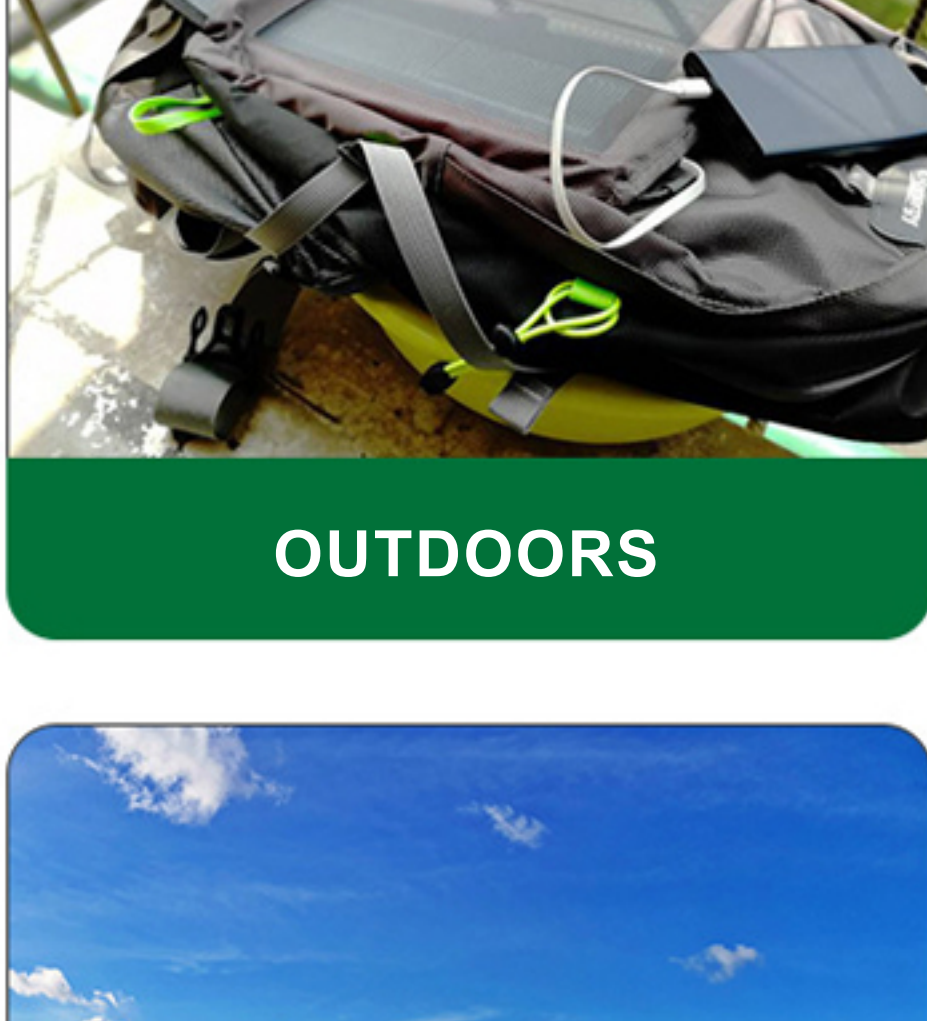

Scene application

Low-carbon and environmentally friendly life

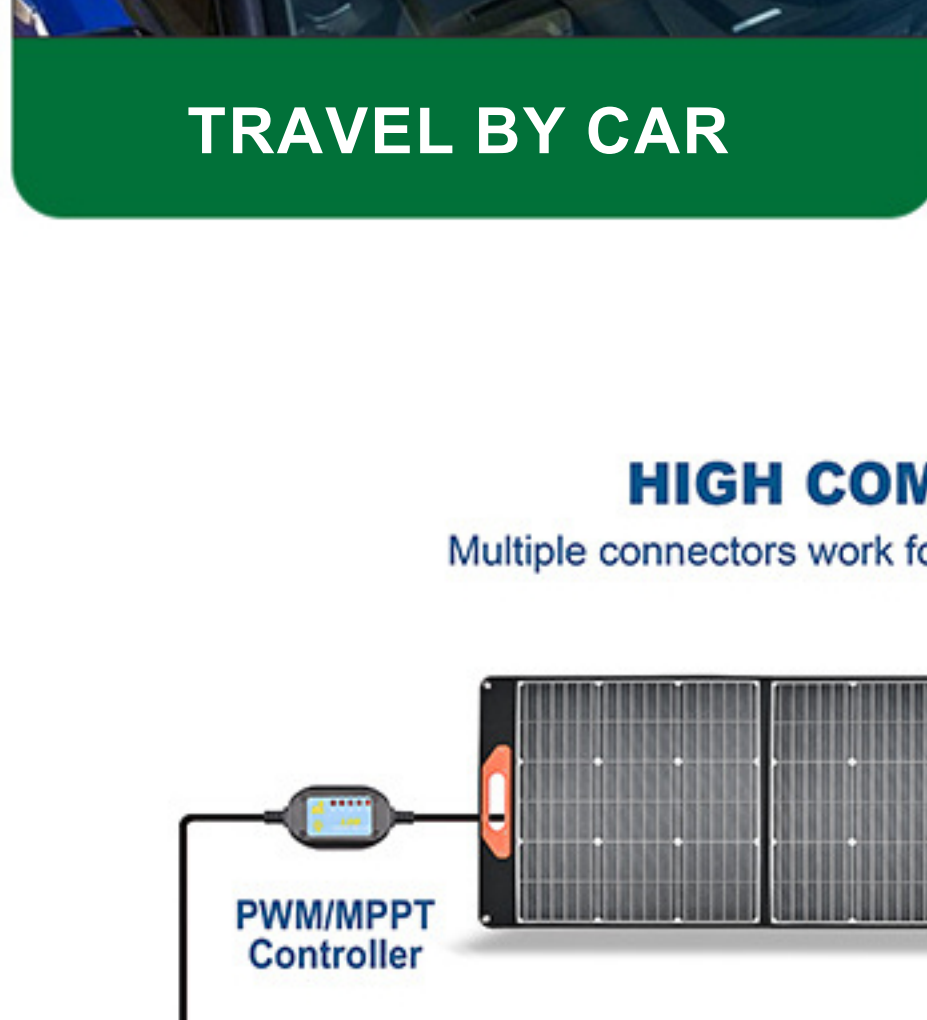

Adapt to various occasions

MOUNTAINEERING

OUTDOORS

TRAVEL BY CAR

RIDING

HIGH COMPATIBILITY

Multiple connectors work for power stations and batteries

Features:

200W/20V Portable Solar Folding Panel

4 cells, integrated lamination process

The junction box is equipped with 7909

interface, line 16, 3 meters long

Chip conversion rate: 22.5%

Overall conversion: 85%

Power output: 200w 19.8V 10.10A

Item: DS200W-SCSSC(19.8V)

Voltage: 19.8V

Power: 200W

Fabric Color: Black+Gray

Expanded Dimensions Dimensions

(unfolded) 2379*540*38mm±5mm

Closed Dimensions Dimensions (folded)

645*540*75±5mm

Weight: 8.58KG
